

**CyberAssureTech**

powered by Sollensys

# Ensure you never lose your data with an Unbreakable Safety Net for Cybersecurity

CyberAssureTech is specifically designed to assure an indestructible and immutable copy of your data, protecting you from cyber threats, environmental disasters, rogue employees, and human error in a way that traditional backups cannot.

**Designed for high compliance industries, priced as low as \$300/ month**

## Why CyberAssureTech?

- CyberAssureTech is the first and only functional double blockchain server available on the market today (Blockchain has never been hacked)
- Works as a safety net for your existing backup system
- Doesn't compete with your existing infrastructure
- Ensures you will always have complete and perfect chain of custody of functional data
- Ensures unquestionable recordkeeping and compliance
- Provides complete immutable data assurance

**Make CyberAssureTech your last line of defense**
